

ROLL SUSHI

Roll Sushi Machine (Square Type)

Model: SVR-NXA

Effortless Operation for Square Roll Sushi

Designed to optimize grain structure and texture, ensuring uniform, fluffy rice sheets for consistent roll sushi production.

VIDEO

SPECIFICATIONS

MODEL: SVR-NXA-ET

INPUT: AC 100 - 240 V, 50/60 Hz, Single phase

POWER RATING: 80 W

CAPABILITY:

Small roll: 400 rolls / hr - Medium roll: 300 rolls / hr - Large roll: 280 rolls / hr

* Production capacity varies depending on operator's speed

HOPPER CAPACITY: Max. 16.5 lb (7.5 kg) of cooked rice

ROLL SIZES: Small roll: 25 mm - Medium roll: 35 mm - Large roll: 46 mm

DIMENSIONS: 14.2 W x 21.7 D x 25.3 H in (360 W x 550 D x 640 H mm)

WEIGHT: Approx. 88.2 lb (40 kg)

KEY FEATURES

Easy Operation

Length, thickness, compression, position, and tightness can be easily changed by touch panel

Selectable Forming Plate

Small, medium, large rolls can be produced by simply replacing the forming plate

Rice Sheet Function

Rice sheet can be supplied continuously without rolling process
